

A RESEARCH PLATFORM DESIGNED BY RESEARCHERS

Research Made Easy.

Mesearchr is a cloud-based suite of tools that enables you to share, organize and complete your research projects from one central place.

Hearing the frustrations of researchers all over the world we built a solution: one platform that helps you complete your research and works with all your other essential software tools.

Mesearchr combines workflow management, survey/form creation, participant communication and team collaboration.

FEATURES

MARKET FOCUS

Academic – Collaborate with your research team, and recruit and communicate with your participants. Mesearchr provides live reporting on participant data and can be easily exported to popular statistical packages.

Market Research – Leverage our workflow management tools to create and conduct surveys using our powerful form builder with live reporting.

Science – Work collaboratively with your team to manage experiments, responsibilities and tasks.

Business – Mesearchr’s powerful workflow and project management tools allow teams and remote workforces to increase their efficiency and effectiveness.

SECURITY

The security of your data is our utmost priority. We follow gold standard technical and organizational security measures in the storage, processing and transfer of data.
